

AFS - just frame-tastic!

This is the brand neutral frame system. The solution for an automated badge production on YOUR embroidery machine. Set new framing conditions with AFS and stimulate your business - with frames within frames.

Just let your machine embroider the badges, name patches and more on the endless „PreFrames“, each with a potential embroidery surface of 12 x 12cm.

You won't need any cutting, nor further rework! Just pop out the badge - and away you go!

Please ask for detailed information.
